

BlastOpt Botswana - Optimization Report

AI-Driven Blasting Optimization Suite

1. Optimization Objectives & Constraints Summary

Objectives: Minimize D&B cost (\$/t) subject to vibration (PPV), flyrock, and fragmentation constraints.

2. Top Recommended Blast Design Configurations

Rank	Burden (m)	Spacing (m)	Stemming (m)	PF (kg/m3)	d50 (mm)	PPV (mm/s)	Cost (\$/t)
1	6.00	7.00	0.00	0.000	0.0	0.00	\$4.80

3. Fragmentation Size Distribution Curve (Best Design)

Kuz-Ram Fragmentation Curve (Percent Passing vs Size)
